November 22, 2016

Board of Supervisors  
County of Imperial  
940 W. Main Street  
El Centro, CA 92243

**Subject: Contract with TASER International, Inc. for the Body Worn Camera Program**

Dear Board Members:

**Requested Action:**

The Board of Supervisors is requested to:

1. Authorize Chairman of the Board to sign a five year contract, as part of the Implementation of the Body Worn Camera Program, with TASER International. The amount should not exceed \$449,285.58 which includes the purchase of hardware and software (cameras and accessories) for \$95,069.26 and five years of data storage for \$354,216.32.

**Background:**

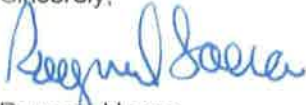

On October 13, 2015 Minute Order #8 our Board approved the acceptance of Federal Award #2015-DE-BX-K056 in the amount of \$74,770 from the Department of Justice (DOJ) Office of Justice Programs (OJP) Bureau of Justice Assistance (BJA). These grant funds and a County match would provide sufficient funding to purchase one hundred (100) Body cameras and accessories and the storage of data (one year) necessary to implement the Body Worn Camera Program. The implementation of this program will provide Imperial County Sheriff's Office Deputies and District Attorney Investigators with the necessary equipment to record all interactions with the public in an effort to improve accountability and transparency.

On April 28<sup>th</sup>, 2016 Request for Proposal (RFP) 16-0675 was published on the County Procurement website. Five different proposals were received, each proposal was reviewed. Based on the review staff recommended Taser International to be awarded. This vendor did not reflect the lowest bid but certainly meets all the requirements and did exceed our expectations by submitting the most comprehensive proposal by offering all cameras, accessories, data storage and software. The purchase contract is a five year contract commitment that will enable our office with the adequate storage capacity to stay in compliance with the current California retention policy for police records. The total amount to be paid on the first year is \$149,179.57 that we previously allocated on FY 2015-2016 County Budget Org Key 1024001-530080 and 1789001-527000. For the following four years equal payments of \$74,854.08 have been scheduled.

**Fiscal Impact:**

Expenses for the first year were allocated and encumbered on FY 2015-2016 County Budget. For the subsequent years our office is currently applying for Federal Funding to cover the cost.

Sincerely,

A handwritten signature in blue ink, appearing to read "Raymond Loera". The signature is fluid and cursive, with the first name "Raymond" and last name "Loera" clearly distinguishable.

Raymond Loera,  
Sheriff-Coroner Marshal

## MINIMUM SPECIFICATIONS

### Body-Worn Cameras

**These specifications described the County of Imperial requirements for a new Body-Worn Camera.**

**1. Recording Format** Video and audio to record and export in a standard, open, non-proprietary format, including both Codec and Container, such that it can be replayed in freely available software (e.g., VLC player) without processing or conversion. Standard open formats should be used for interoperability. Examples include MP4 and MKV. Data formats that can only be viewed within manufacturer-specific replay software are not recommended. VGA, HD 720P, and 1080 HD are predominant standard resolutions. The higher the resolution, the more storage is needed. Estimates below were created assuming H.264 compression with medium to high motion at 30 frames per second (fps) derived using a heuristic formula widely used in industry. Actual storage utilized is dependent on scene complexity and the motion of the video captured. Consider what sort of analysis may be conducted on the video before selecting a resolution.

<b>2. Video Resolution</b>	VGA (640 x 480)	550 — 1,100 MB per hour (0.55 — 1.1 GB)
	HD 720P (1280 x 720)	1,650 - 3,325 MB per hour (1.65 — 3.325 GB)
	1080 HD (1920 x 1088)	3,750 - 7,550 MB per hour (3.65 — 7.55 GB)

**3. Video Encoding/ Compression** Use of the lowest possible amount of compression in order to maximize the amount of information available to law enforcement. Consider what sort of analysis may be conducted on the video before selecting video encoding or compression. Examples include MPEG-4, H.264, and H.265. H.264 is an improvement over MPEG-4 compression. H.265 is a new standard which further reduces storage needs while.

**4. Frame Rate** 30 frames per second (fps) is a standard video frame rate. Higher recording speeds capture more motion detail but require increased storage. Frame rates lower than 25 fps suffer from *increased motion blur*.

**5. Horizontal Field of View** Adequate to capture a majority of activity at a reasonable distance. This would likely require at least a 90 degree field of view. Wide angle lenses capture more of a scene, but distort the view and lose detail towards the edges of the frame. Software tools may be required to properly analyze or view the video from extremely wide angle video.

**6. Camera Focus** Device should be able to focus on all objects from about 1 foot away to infinity. Continuous autofocus or fixed focus should be employed for usability. Manual settings should be avoided as they can distract the user. Motion jitter and blur can be significant when the camera is moving. Automatic image stabilization can reduce this effect.

**7. Audio Quality** The system is capable of clearly capturing conversational speech at a distance of 3 feet without wind or excessive background noise.

**8. *Separate Audio Resolution and Encoding/ Compression*** If the device will be used in a mode to record audio only, compressed audio requires less storage than video (4-60 MB per hour per microphone depending on desired quality). If high speech quality is needed, a sampling rate of at least 22 kHz with at least 24-bit capture is suggested per microphone. Higher values might be necessary to capture increased fidelity at a distance. Standard open encoding with speech quality resolution suggested. Examples include MP3 and WMA.

**9. *Recording Triggering*** Cameras could record continuously or be user-triggered or event triggered. Cameras take time to start recording video after being powered on and after recording is initiated. This recording latency period should be minimal.

**10. *Night-time/Low Light*** Quality of video footage recorded in low light or night conditions should be useable. Visible flash and infrared illumination can increase the quality of video taken at night will affect battery life. Low-light filtering, infrared, near infrared, and other low-light compensation technologies or mechanical filters can increase the quality of video taken in low light and severe weather conditions but can affect scene and motion detail .

**11. *Synchronization and Metadata*** The device is capable of recording audio simultaneously and time synchronized with video. Consider the additional information that should be collected with the recorded material. Automatically generated data about the wearer, location, date, and time can be collected and packaged in the video format. Device clock must be must be synchronized with an external universal clock, either GPS or another source, when the unit is plugged in for absolute time of day to ensure accuracy.

**12. *Tamper Resistance*** The device prohibits recordings from being edited or deleted and should not overwrite existing data before they have been transferred. Systems that can export a hash value of files being transferred may provide an enhanced capability to demonstrate tamper resistance. Standard encryption such as AES can be employed to protect data and improve the management of lost devices and memory cards.

**13. *Data Transfer*** Recommend standard USE12/USB3 compliant connection (mini/micro) for charging and/or data transfer. USB3 is preferred as speeds are considerably faster. The connections should be standard on both the device and on any docking station. Data connections that use a proprietary form factor are not recommended.

**14. *Data Export*** Device exports all recorded footage to data archiving or data management system in its original file format and without loss of quality or associated metadata. Device should record an audit log which should include information such as device serial number and device events—e.g., on/off, charging, start/stop recording, remaining storage capacity, etc.

**15. *Onboard Storage*** Storage can be integrated into the device or provided on removable industry standard memory cards. Removable media has utility in terms of versatility and expansion but comes with security risks. Consider whether enough storage should be available to record a full shift by the officer wearing the device, such as 8-12 hours of non-volatile onboard storage. Loss of power must not cause data to be lost or corrupted.

**16. Battery Life** Consider whether the battery should provide enough power to record a full shift by the officer wearing the device, such as a 12 hour battery life. Devices that do not run on rechargeable batteries are not recommended. **12 hour minimum battery life expectancy**

**17. Durability** Device should withstand considerable and repetitive pressure, vibration, and mechanical shock. It should operate within a temperature range from very cold to very hot and be resistant to common environmental hazards, such as dust, condensation, water splashes, and RF interference.

**18. Weight and Form Factor** Device should not distract or hinder the officer wearing the device from performing other job functions, especially ones related to officer safety. Cameras are designed with widely varying mounting methods and options. Device should be selected for maximum usability and safety.

**19. In-car mobile video integration** Device will be able to integrate seamlessly with an in-car mobile video solution that is offered by the same vendor. The device is capable of serving dual purposes (Serves as an audio pack/microphone for the in-car mobile video system).

**20. Software** Device will be accompanied with a software pack/system that has complete redaction capabilities. Redaction software should be user-friendly and has the ability to accommodate most law enforcement needs such as redacting small objects or objects that are moving throughout the duration of the video. Software will also include an audit or chain of custody trailing feature that not only offers access, sharing or storage status but also multiple traces for videos that are created after a master video has been altered, redacted or edited. The software should also be able to maintain a master copy that remains un-edited regardless of circumstance. The software should also contain a cloud-based service that features an un-limited data storage that would satisfy the requirements of storing high quality or high definition video. The software shall also be able to offer meta data tagging that works specifically with Spillman CAD/RMS that is utilized by the Imperial County Sheriff's Office.

**NOTE: ANY FAILURE TO MEET THESE SPECIFICATIONS MAY CAUSE DENIAL OF BID**

## TASER Assurance Plan Appendix

The TASER Assurance Plan or "TAP" has been purchased as part of the Quote attached to this Agreement. TAP provides hardware extended warranty coverage, Spare Products, and Upgrade Models at the end of the TAP Term. TAP only applies to the TASER Product listed in the Quote with the exception of any initial hardware or any software services offered for, by, or through the Evidence.com website. The Agency may not buy more than one TAP for any one covered Product.

- 1 **TAP Warranty Coverage.** TAP includes the extended warranty coverage described in the current hardware warranty. TAP warranty coverage starts at the beginning of the TAP Term and continues as long as the Agency continues to pay the required annual fees for TAP. The Agency may not have both an optional extended warranty and TAP on the Axon camera/Dock product. TAP for the Axon camera products also includes free replacement of the Axon flex controller battery and Axon body battery during the TAP Term for any failure that is not specifically excluded from the Hardware Warranty.
- 2 **TAP Term.** TAP Term start date is based upon the shipment date of the hardware covered under TAP. If the shipment of the hardware occurred in the first half of the month, then the Term starts on the 1st of the following month. If the shipment of the hardware occurred in the second half of the month, then the Term starts on the 15th of the following month.
- 3 **SPARE Product.** TASER will provide a predetermined number of spare Products for those hardware items and accessories listed in the Quote (collectively the "Spare Products") to keep at the Agency location to replace broken or non-functioning units in order to improve the availability of the units to officers in the field. The Agency must return to TASER, through TASER's RMA process, any broken or non-functioning units for which a Spare Product is utilized, and TASER will repair or replace the non-functioning unit with a replacement product. TASER warrants it will repair or replace the unit which fails to function for any reason not excluded by the TAP warranty coverage, during the TAP Term with the same product or a like product, at TASER's sole option. The Agency may not buy a new TAP for the replacement product or the Spare Product.
  - 3.1. Within 30 days of the end of the TAP Term the Agency must return to TASER all Spare Products. The Agency will be invoiced for and are obligated to pay to TASER the MSRP then in effect for all Spare Products not returned to TASER. If all the Spare Products are returned to TASER, then TASER will refresh the allotted number of Spare Products with Upgrade Models if the Agency purchases a new TAP for the Upgrade Models.
- 4 **TAP Upgrade Models.** Upgrade Models are to be provided as follows during and/or after the TAP Term: (i) an upgrade will provided in year 3 if the Agency purchased 3 years of Evidence.com services with Ultimate Licenses or Unlimited Licenses and all TAP payments are made; or (ii) 2.5 years after the Effective Date and once again 5 years after the Effective Date if the Agency purchased 5 years of Evidence.com services with an Ultimate License or Unlimited Licenses or OSP and made all TAP payments.

Any products replaced within the six months prior to the scheduled upgrade will be deemed the Upgrade Model. Thirty days after the Upgrade Models are received, the Agency must return the products to TASER or TASER will deactivate the serial numbers for the products received unless the Agency purchases additional Evidence.com licenses for the Axon camera products the Agency is keeping. The Agency may buy a new TAP for any Upgraded Model.

**4.1. TAP Axon Camera Upgrade Models.**

**4.1.1.** If the Agency purchased TAP for Axon Cameras as a stand-alone service, then TASER will upgrade the Axon camera (and controller if applicable), free of charge, with a new on-officer video camera that is the same product or a like product, at TASER's sole option. TASER makes no guarantee that the Upgrade Model will utilize the same accessories or Dock. If the Agency would like to change product models for the Upgrade Model, then the Agency must pay the price difference in effect at the time of the upgrade between the MSRP for the offered Upgrade Model and the MSRP for the model that will be acquired. No refund will be provided if the MSRP of the new model is less than the MSRP of the offered Upgrade Model.

**4.1.2.** If the Agency purchased Unlimited License or OSP, then TASER will upgrade the Axon camera (and controller if applicable), free of charge, with a new on-officer video camera of the Agency's choice.

**4.2. TAP Dock Upgrade Models.** TASER will upgrade the Dock free of charge, with a new Dock with the same number of bays that is the same product or a like product, at TASER's sole option. If the Agency would like to change product models for the Upgrade Model or add additional bays, then the Agency must pay the price difference in effect at the time of the upgrade between the MSRP for the offered Upgrade Model and the MSRP for the model desired. No refund will be provided if the MSRP of the new model is less than the MSRP of the offered Upgrade Model.

**5. TAP Termination.** If an invoice for TAP is more than 30 days past due or the Agency defaults on its payments for the Evidence.com services then TASER may terminate TAP and all outstanding Product related TAPs. TASER will provide notification that TAP coverage is terminated. Once TAP coverage is terminated for any reason, then:

**5.1.** TAP coverage will terminate as of the date of termination and no refunds will be given.

**5.2.** TASER will not and has no obligation to provide the free Upgrade Models.

**5.3.** The Agency will be invoiced for and are obligated to pay to TASER the MSRP then in effect for all Spare Products provided under TAP. If the Spare Products are returned within 30 days of the Spare Product invoice date, credit will be issued and applied against the Spare Product invoice.

**5.4.** The Agency will be responsible for payment of any missed payments due to the termination before being allowed to purchase any future TAP.

- 5.5.** If the Agency received Axon Products free of charge and TAP is terminated before the end of the term then (a) the Agency will be invoiced for the remainder of the MSRP for the Products received and not already paid as part of the TAP before the termination date; or (b) only in the case of termination for non-appropriations, return the Products to TASER within 30 days of the date of termination.
